

UKTIMESOLUTIONS I Face Facial Recognition System

Face Scan is an electronic clocking-in system, comprising of a wall-mounted i face facial recognition terminal and PC-based software.

Simply define each of your daily/weekly work patterns and the easy-to-use software will calculate the most complex of overtime rules. Replace laborious, manual, 'pen-and-paper' calculations with this automated, total-hours-worked solution to improve efficiency and reduce human error.

Clicking's can be collected over your network or via usb memory stick.

Implementing *Face Scan* *will* save you time and money.

Available in two versions:

Version 1 for up to 75 employees

Version 2 for up to 150 employees
